Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Wanthal (5,075,034) in view of Brytus (4,751,278).

3. Wanthal teaches an epoxy adhesive composition which is used to bind surfaces and is therefore applied as a coating to the surfaces being bonded (Abstract column 1 lines 18-30). A fair interpretation of one of the teachings at column 3 lines 42-47 is that the hardening composition used in this adhesive contains 5 to 80% Cardolite NC-540 and the balance is a polyamide. Brytus teaches at column 5 in a footnote to the Table that Cardolite NC-540 is a phenalkamine. Wanthal teaches an epoxy composition used to form a coating and which renders the coating composition of the instant claims obvious because it contains the claimed curing agents e.g. hardeners. Ferric oxide, a well known pigment is taught at column 2 line 62.
